

PALMIN

ACCESSORIES FOR MUSICIANS

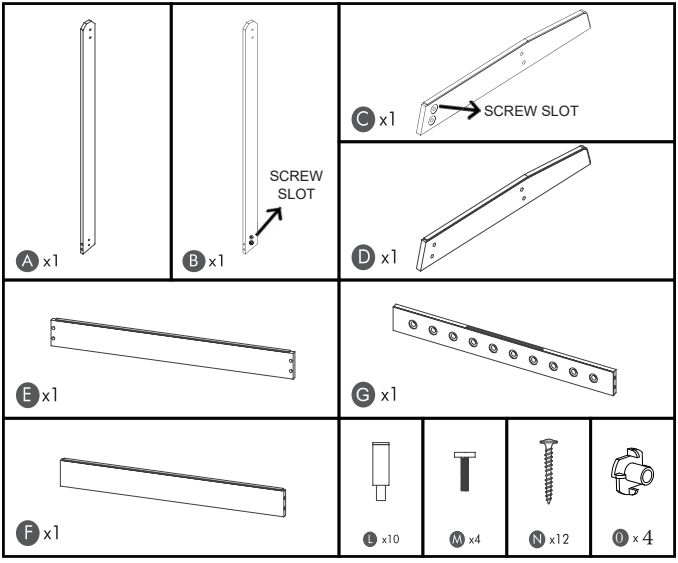

PALMIN GS Quintet (Black walnut)

PRODUCT FAQ

1. What should be paid attention to during installation?
(1) You need to prepare a "+" type screwdriver and install it according to the instal lation steps. Please pay attention to the position of the screw groove to judge the relative position of each board to avoid reverse installation.
(2) When using screws, be careful to tighten them vertically, otherwise it will easily cause the wood to crack.

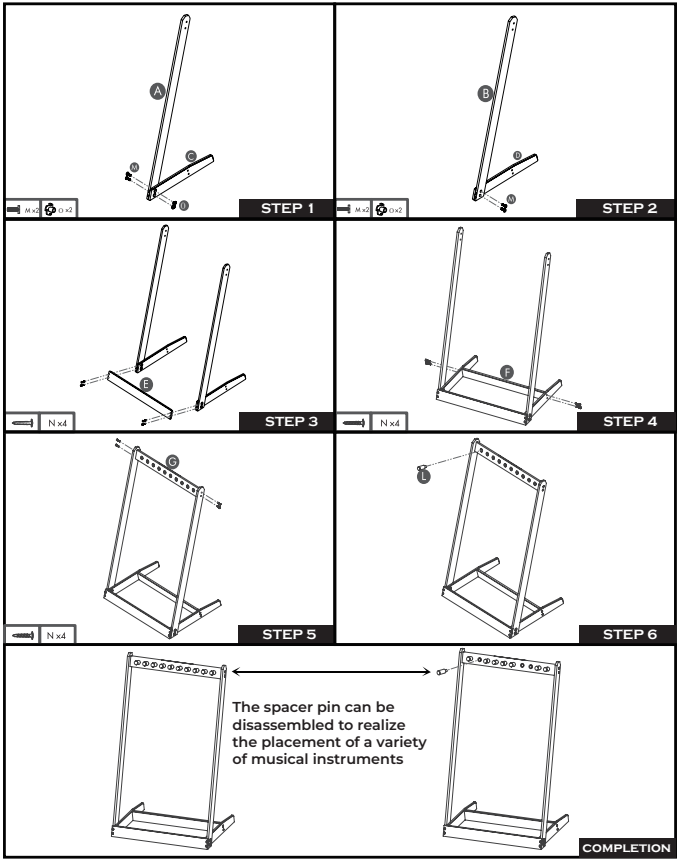

2. The guitar stand is unstable?
(1) You need to check whether the screws are tightened;
(2) You need to check whether the bottom is flat.

3. Does the guitar stand have color difference and inconsistent wood grain?
Since strich is made of natural solid wood, the wood grain and density of each piece of wood are inconsistent. Therefore, it is normal for the guitar stand to have slight color deviation, and it will not affect normal use.
